A MEMBER OF VIRTUS HEALTH

Christmas and New Year operating hours

Over this Christmas and New Year period we will still be here for you.

Our clinics will remain open throughout the Christmas and New Year period, other than the 25th/26th December and the 1st January. Our nursing, admin and counselling team will be available throughout the Christmas period to provide you with all the support and assistance that you need. To give our embryologists a break, our last egg collection will be on 18th December. We will therefore not be starting any stimulation cycles from the 6th December 2020. The start of stimulation is the first day of taking FSH medication. If you have any questions at all, please do not hesitate to contact us. The table below summarises by site the treatment stop and start dates for over Christmas and New Year:

Clinic Location	Phone	Normal Opening Hours	Christmas and New Year Opening Hours	Treatment Stop / Start dates for FSH medication i.e. IVF, ICSI, Egg freezing, or egg donation cycles	Frozen embryo transfer cycles (FET)
